PROFILE

Recent work has focused on Opera MES, a Manufacturing Execution System for manufacturing operations, with contributions across frontend development, software design, product maintenance, usability, performance, and complex production workflows.

Previous product work includes ArkCase and Move One, with hands-on experience in JavaScript interfaces, CSS, forms, modals, UI maintenance, bug fixing, and long-running enterprise applications.

EXPERIENCE

Software Engineer Jun 2024 - Present
CYBERTEC Hybrid

Continuing development of Opera MES after OPEN DATA was acquired by CYBERTEC, with broader engineering focus across frontend development, software design, system improvements, product maintenance, usability, performance, and reliability.

[Opera MES / Software Design / Frontend / Maintainability / Enterprise Product](#)

Frontend Developer Jun 2018 - Jun 2024
OPEN DATA Srl Skopje, Macedonia

Worked on Opera MES, building and maintaining web-based user interfaces for complex production workflows, with emphasis on usability, reliability, and long-term maintainability.

[JavaScript / HTML5 / CSS / Production Workflows / Reusable UI](#)

IT Administrator Mar 2017 - Jun 2018
Winner - Vienna Insurance Group Macedonia

Maintained internal IT infrastructure, network reliability, data collection scripts, web platform operations, and day-to-day technical support for users.

[Networking / IT Support / Scripting / Web Platform](#)

Frontend Developer Jul 2016 - Mar 2017
Armedia Macedonia

Worked on ArkCase, focusing on frontend maintenance, bug fixing, CSS issues, modals, forms, layout consistency, usability, and application stability.

[ArkCase / JavaScript / AngularJS / Forms / CSS](#)

Frontend Developer May 2015 - Apr 2016
Vorteks ED Skopje

Worked on Move One, a transport and relocation management product, contributing to frontend UI development and maintenance with Stylus, jQuery, and Backbone.js.

[Move One / JavaScript / CSS / Stylus / Backbone.js](#)
